DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 5-49 and 51-67 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Prior art of record fails to teach or fairly suggest a system and method for providing an intercom service to a plurality of telephones associated with a calling number at a location, comprising: receiving at a remote network an intercom service request from a first telephone at the location, the intercom service request including the calling number associated with the location; determining that the calling number corresponds to a subscriber to the intercom service; receiving an on-hook signal at the remote network from the first telephone at the calling location and directing initiation of an intercom call from the network to the location upon receiving the on-hook signal as recited in independent claims 1, 17, 30, 36, 43, 47 and 54.

Prior art teaches (see US 5,930,346 Chen) teaches intercom service that requires use of a separate switch at customer premises and the separate switch is what provides an on-hook signal once an intercom call has been replaced. In stead of, requiring user to first call remote network and hang up phone so remote network can call back to setup intercom call as recited in independent claims 1, 17, 30, 36, 43, 47 and 54 and argued by Applicant in paper dated 12/17/04, page 14, lines 6-14.

Prior art (see US 6,345,047 Regnier) teaches using telephony adapter used for intercom service wherein user presses "#" to invoke the service, speaks "Sophie" and

hangs up. The adapter recognizes the “#” code and relays it to software residing in the adapter, informing it of the request for the intercom service. Next, the adapter applies Sophie distinctive ringing pattern on home wiring port. When Sophie answers from some phone in the house, the caller would pick-up his phone and communication would be established (column 19 lines 6-21).

However, Regnier does not require subscribers to subscribe to intercom service whereby the subscribers residing at same location utilize intercom service by dialing into remote network, hang-up and the remote network calling back to the same location that is requesting the intercom service as recited in independent claims 1, 17, 30, 36, 43, 47 and 54 and argued by Applicant in paper number 7, Amendment “A”, dated 10/14/2003, page 14, second full paragraph.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
